The screenshot displays a Microsoft Excel spreadsheet titled "Finance.xls" with the @RISK add-in active. The main window shows a financial model with a risk analysis chart for NPV (10%). The chart is a histogram with a normal distribution curve overlaid, showing the probability distribution of NPV values. The x-axis represents NPV values in millions of dollars, ranging from -0.20 to 1.40. The y-axis represents the probability density function, ranging from 0.0 to 1.6. The chart indicates that 90.0% of the simulated NPV values are greater than or equal to 0.033, and 5.0% are greater than or equal to 0.904. The mean value is 0.426, and the standard deviation is 0.280.
